**Re: Circleville Recycling / Pickaway County
Industrial Storm Water Permit 4GR00355*DG**

Dear Mr. Cassidy:

This letter is written in regard to the storm water inspection that I conducted on February 25, 2013, at Circleville Recycling, located at 1097 US Route 22 West, in Circleville, Ohio. The inspection was conducted to determine compliance with your industrial storm water permit. Your facility is a recycling facility. The following items were noted during the inspection:

1. It does not appear that you have a valid industrial storm water permit. Please submit an industrial storm water permit renewal application.
2. Overall, the facility was well kept and maintained.
3. There were two manholes that need filter covers, such as dandy bag covers. They were located near the storage of sediment-laden product. One manhole had a filter cover. However, the filter was not installed properly on the manhole and was not effective at preventing debris from discharging to the storm water drain.
4. The facility had a spill kit if needed and an emergency contact list was posted for spills.
5. A storm water pollution prevention plan and a spill prevention plan were developed for this facility. Please review and certify the plans annually or when there is a change in management. Also, conduct monthly inspections of the erosion controls and keep a log of the inspections.
