Re: Notice of Violation
Anchor Acquisition Inc. / Fairfield County
Spill Report & Industrial Storm Water Inspection
Industrial Storm Water Permit 4GP0030853

Dear Mr. Ryder:

This letter is written in regard to the spill incident and industrial storm water inspection that I conducted on December 12, 2012, at Anchor Acquisition Inc., located at 1115 West Fifth Avenue, in Lancaster, Ohio. The reason for the inspection was due to a spill report. You stated that the spill was attributed to a metal slab that was covering a storm water drain ruptured a fuel tank on a truck. The fuel leaked into nearby storm water drains. Please consider this a formal notice of violation. The following items were noted during the inspection:

1. The storm water drains through-out the site are in need of repair. Metal slabs cover the drains. One of the metal slabs ruptured a fuel tank on a truck and caused the fuel to discharge to several storm water drains. The Ohio EPA's remedial response group assisted in the clean-up of the fuel spill.
2. There was a waste tote that contained an oily waste located near the entrance to the facility. This waste tote needs to be in secondary containment and under roof. Please see attached picture.
3. There were old oily and greasy parts that were stored outside. These parts need to be stored in containment and under roof. Please see attached picture.
4. There were several waste containers including a trash roll-off container without a cover. The waste containers need to have a cover.
5. The monthly storm water inspection forms were provided to me by August Mack.
