**Re: Sugar Mill Development / Licking County**

Dear Mr. Dozer:

This letter is written regarding the storm water inspection that I conducted at Sugar Mill Development, located in Licking County, on March 13, 2013. The Agency understands that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities.

It is my understanding Ryan Homes wish to continue construction within this development. I have received and reviewed the previously approved Storm Water Pollution Prevention Plan for this site. Based on my site inspection and the current SWPPP, I recommended an onsite meeting to ensure the minimum conditions of the Permit are addressed.

The permit is active but will require renewal in April of 2013. As a result, I suggest Ryan Homes renews the permit including the current applicant/permittee information in the submittal.

During our telephone conversation of March 19, 2013, you agreed to the onsite inspection to determine additional measures necessary to ensure compliance. I am currently awaiting contact from your engineer to a date of inspection.

If you have any question regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844.

Sincerely,

Harry Kallipolitis  
Storm Water Coordinator  
Division of Surface Water
