**Re: Storm Water Inspection at Fedex Ground-Whitehall / Franklin County
Permit #:4GR00535*EG**

To whom it may concern:

This letter is written in follow up to a preliminary Industrial Storm Water inspection I conducted, at Fedex Ground-Whitehall located at 4600 Poth Road, Whitehall, Ohio on August 7, 2012. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Industrial Activities. During the inspection, I noted the following:

Site Observations:

- **Fueling aisle:** During the preliminary investigation I noted the fueling aisle associated with this facility. The fueling aisle was covered minimizing expose threats to storm water quality. Please indicate where the storm water associated with the fueling aisle is directed.
- **Fleet Management:** Please be able to address the location where all trucks are washed. Please recognized on site mobile power washing activities are prohibited without proper collection and disposal of waste water.
- **Permitting:** This facility has filed for and was approved for coverage under the Multi Sector General Permit (MSGP). Please note the Storm Water Pollution Plan may require updating to ensure compliance with the conditions of new permit. Please refer to the general permitting requirements for the development of the Storm Water Pollution Plan in addition to the **sub sector P** permitting requirements for this site.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844. Follow up inspections will be conducted to ensure the conditions of the General Permit are continuing to be met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
