**Re: Industrial Storm Water Inspection at Westerville Satellite Facility / Franklin County  
Permit #: 4GR00375\*BG**

Dear Mr. Bennett:

This letter is written in follow-up to an industrial storm water inspection I conducted at Westerville Satellite Facility located at 6055 Westerville Road Westerville, Ohio on April 11, 2013. Based on the conditions in the permit and our site observations, the following items were noted:

**Storm Water Management Controls:**

**Containment Measures Adjacent to Alum Creek:**

- A containment pond is established for the old drop off location adjacent to Alum Creek. I have noted new activity in this area with no apparent maintenance to the pond. The containment pond appears more accessible now and I strongly recommend upgrades to the impoundment to ensure the intended use of adequate containment. The pond should be clean and the embankments reinforced.

**Additional Containment Measures**

- The remaining containment measures are temporary at best. A centralized collection system is necessary to ensure long term compliance with the general permit.

If you have any questions regarding this letter or the inspection, please do not hesitate to call me at our Central District Office at (614) 728-3844.

Sincerely,

Harry Kallipolitis  
Storm Water Coordinator  
Division of Surface Water  
Central District Office
