Re: Guernsey County
Island Aseptics, LLC
Compliance Enforcement Inspection
0IH00025; OH0076732
Correspondence (IWW)

Mr. John Kasinecz, Plant Manager
Island Aseptics, LLC
100 Hope Road
Byesville, Ohio 43723

Dear Mr. Szymaniak:

On March 29, 2013, I conducted a Compliance Evaluation Inspection (CEI) of the Island Aseptic discharging cooling water system. The purpose of the inspection was to determine the facility's compliance status with the terms and conditions of NPDES Permit Number 0IH00025*HD. Eric Phillips, operator, was present during the inspection.

As a result of the inspection, I have the following comments:

1. A review of the facility's discharge monitoring reports (DMRs) from January 2011 through February 2013 showed two (2) violations of permit limit violations for failing to sample for oil and grease in March 2011 and August 2012. A previous response has been provided for these violations.
2. Upon further review of you DMR data, it appears that numerous values for the reported flow have been reported in gallons per day instead of million gallons per day. Please review your data and submit revised eDMRs to correct the data as necessary.
3. Outfall 001 contains cooling water from the juice making process that takes place at Island Aseptic. Final Outfall 001 was observed during the inspection. I observed no impacts to the stream from discharge
4. Your NPDES permit for this facility expires on November 30, 2013. Page 1 of your NPDES application states "In order to receive authorization to discharge beyond the above date of expiration, the permittee shall submit such information

and forms as required by the Ohio EPA no later than 180 days prior to the above date of expiration." A renewal application must be submitted by June 3, 2013 to be considered timely.

Please address and provide a response to item #2 within thirty (30) days upon receipt of this letter.

The Ohio EPA strongly encourages pollution prevention as the preferred approach for waste management. The first priority of pollution prevention is to eliminate the generation of wastes and pollutants at the source (source reduction). For those wastes or pollutants that are generated, the second priority is to recycle or reuse them in an environmentally sound manner. You can benefit economically, help preserve the environment, and improve your public image by implementing pollution prevention programs. For more information about pollution prevention, including fact sheets or U.S. EPA's "Facility Pollution Prevention Guide" (EPA/600/R-92.008), please contact the Ohio EPA Pollution Prevention Section at (614) 644-3469.

Attached is a copy of the inspection report. If you have any questions about my inspection, please feel free to contact me at (740) 380-5418 or by email at tim.fulks@epa.ohio.gov.

Sincerely,

Tim Fulks
District Representative
Division of Surface Water

TF/dh

Sections E through K: Complete on all inspections as appropriate
Y = Yes; N = No; N/A = Not Applicable; N/E = Not Evaluated

Section E: Permit Verification

Inspection observations verify the permit

- (a) Correct name and mailing address of permittee..... Y
- (b) Correct name and location of receiving waters Y
- (c) Do Categorical Standards apply? If yes, list applicable standards..... N
- (d) Product(s) and production rates conform with permit application (Industries) N/A
- (e) Flows and loadings conform with NPDES permit N/A
- (f) Treatment processes are as described in permit application Y
- (g) All discharges are permitted Y
- (h) Number and location of discharge points are as described in permit..... Y
- (i) Storm water discharges properly permitted N/A

Comments/Status:

Section F: Compliance

- (a) Any significant violations since the last inspection N
- (b) Appropriate Non-compliance notification of violations..... Y
- (c) Permittee is taking actions to resolve violations Y
- (d) Permittee has a compliance schedule N
- (e) Compliance schedule contained in N/A
- (f) Permittee is in compliance with schedule N/A
- (g) Has biomonitoring shown toxicity in discharge since last inspection N/A

Comments/Status:

Section G: Operation and Maintenance

Treatment Works:

Treatment facility properly operated and maintained

- (a) Standby power available generator or dual feed N
 - i. What does the back-up power source operate
 - ii. How often is the generator tested under load
- (b) Which components have an alarm system available for power or equipment failures
- (c) All treatment units in service other than backup units Y
- (d) What method is used for scheduling routine and preventative maintenance (calendar, software, etc.)
- (e) Any major equipment breakdown since last inspection N
- (f) Operation and maintenance manual provided and maintained N/E
- (g) Any plant bypasses since last inspection N
- (h) Any plant upsets since last inspection N

Comments/Status:

Section H: Sludge Management

- (a) Method of Sludge Disposal.....
 - Land Application
 - Haul to Another NPDES Permittee
 - Haul to a Mixed Solid Waste Landfill

*if one of the selected methods is land application, complete applicable charts.

Class A – Exception Quality Sewage Sludge (monitoring station 584)

Pathogen Reduction Alternative	84370 Vector Attraction Reduction Options							
	Option 1 – 38% Volatile Solids Reduction	Option 2 – Anaerobic Bench Scale Analysis	Option 3 – Aerobic Bench Scale Analysis	Option 4 – Specific Oxygen Uptake Rate	Option 5 – Aerobic Time and Temperature	Option 6 – Alkali Addition	Option 7 - >75% Solids without Unstabilized Solids	Option 8 - >75% Solids with Unstabilized Solids
Alternative 1 – Time and Temperature Regime (84369)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Alternative 2 – High pH and High Temperature (84369)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Alternative 3 – Other Processes (84369)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Alternative 4 – Unknown Processes (84369)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- (b) Has amount of sludge generated changed significantly since the last inspection N/A
- (c) How much sludge storage is provided at the plant
- (d) Records kept in accordance with State and Federal law (5 years according to OAC 3745-40-06) N/A
- (e) Any complaints received in last year regarding sludge N/A
- (f) 5/8" screen at headworks for facilities that land apply sludge N/A
- (g) Are sludge application sites inspected to verify compliance with NPDES permit N/A
- (h) Is a contractor used for sludge disposal N/A
If so, what is the name of the contractor

Comments/Status:

Section I: Self-Monitoring Program

Flow Measurement:

- (a) Primary/Secondary flow measuring devices operated and maintained N/A
Type of device (e.g., weir with ultrasonic level sensor):
- (b) Calibration frequency adequate N/A
Date of last calibration:
- (c) 24-hour recording instruments operated and maintained N/A
- (d) Flow measurement equipment adequate to handle full range of flows Y
- (e) Actual flow discharged is measured N/A
- (f) Flow measuring equipment inspection frequency
Daily: Weekly: Monthly: Other:

Comments/Status:

Sampling:

- (a) Sampling location(s) are as specified by permit Y
- (b) Parameters and sampling frequency agree with permit Y
- (c) Permittee uses required sampling method (see GLC page) Y
- (d) Monitoring records (i.e., flow, pH, DO) maintained for a minimum of three years including all original strip chart recordings (i.e., continuous monitoring instrumentation, calibration and maintenance records) Y

Comments/Status:

Laboratory:

General

- (a) Does the Quality Assurance Manual contain written Standard Operating Procedures (SOP's) for all analysis performed onsite N/A
- (b) Do SOP's include the following if applicable N/A
 - Title
 - Scope and Application
 - Summary
 - Sample Handling & Preservation
 - Interferences
 - Apparatus and Materials
 - Reagents
 - Procedure
 - Calculations
 - Quality Control
 - Maintenance
 - Corrective Action
 - Reference (Parent Method)

Note: Standard Methods 1020A establishes that "Quality assurance (QA) is the definitive program for laboratory operation that specifies the measure required to produce defensible data of known precision and accuracy. Standard operating procedures are to be used in the laboratory in sufficient detail that a competent analyst unfamiliar with the method can conduct a reliable review and/or obtain acceptable results." SOPs should be developed for each analytical procedure.

- (c) EPA approved analytical testing procedures used (40 CFR 136.3) Y
 - (d) If alternate analytical procedures are used, proper approval has been obtained N/A
 - (e) Analyses being performed more frequently than required by permit N
 - (f) If (e) is yes, are results in permittee's self-monitoring report N/A
 - (g) Satisfactory calibration and maintenance of instruments/equipment (see score from GLC page) N/A
 - (h) Commercial laboratory used Y
- Parameters analyzed by commercial lab: **Oil & Grease**
 Lab name: **Coshocton Environmental**

Discharge Monitoring Report Quality Assurance (DMRQA)

- (a) Participation in latest USEPA quality assurance performance sampling N/A
Date:
- (b) Were any parameters "Unsatisfactory" N/A
- (c) Reasons for "Unsatisfactory" parameters

Comments/Status:

Section J: Effluent/Receiving Water Observations

Outfall #: **001**

Outfall Description: **Final Outfall**

Receiving Stream: **Wills Creek**

Receiving Stream Description: **No observable adverse impact to stream**

Comments/Status:

Section K: Multimedia Observations

- (a) Are there indications of sloppy housekeeping or poor maintenance in work & storage areas or laboratories N
- (b) Do you notice staining or discoloration of soils, pavement or floors..... N
- (c) Do you notice distressed (unhealthy, discolored, dead) vegetation N
- (d) Do you see unidentified dark smoke or dust clouds coming from sources other than smokestacks N
- (e) Do you notice any unusual odors or strong chemical smells..... N
- (f) Do you see any open or unmarked drums, unsecured liquids, or damaged containment facilities N

If any of the above are observed, ask the following questions:

- (1) What is the cause of the condition?
- (2) Is the observed condition or source a waste product?
- (3) Where is the suspected contaminant normally disposed?
- (4) Is this disposal permitted?
- (5) How long has the condition existed and when did it begin?
