**Re: Storm Water Inspection at Property Owned by Ed Nelson / Licking County
Permit #4GC03911*AG**

Dear Mr. Nelson:

This letter is written regarding the storm water inspection I conducted at Property Owned by Ed Nelson on Conner Avenue (PID 063-150150-00.000) in Pataskala, Ohio on April 30, 2013. The Agency understands these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following items must be addressed:

Sediment and Erosion Controls

- During the inspection I was able to access the construction site. I noted the fill activities and the current construction of the culvert to promote drainage. Please continue to stabilize the area with temporary cover.
- Please continue with the timely implementation of silt fence for all new affected areas.

401/44 Permitting

- During the inspection, I noted the areas where the standing water was evident. I was unclear if this area was wet as a result of the fill placement or part of a jurisdictional wetland. Please note, fill of any wetland may require specific permits from Army Corps of Engineers (ACOE) and/or Ohio EPA. As stated earlier, this issue was referred to our 401 section for further investigation.

If you have questions concerning the inspection or my letter please do not hesitate to contact me at our Central District Office.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
Central District Office
