**Re: Nissen Chemitec America, Madison County
Industrial Storm Water Permit 4GR00186*EG**

Dear Mr. Ford:

This letter is written in regard to the storm water inspection that I conducted at Nissen Chemitec America, located at 350 East High Street, in London, Ohio. The inspection was conducted on May 10, 2013, to determine compliance with your industrial storm water permit. Your facility manufactures plastic molding for the automotive and motorcycle industry. The following items were noted during the inspection:

1. Your facility had a covered loading/unloading area. The previous discharge from this area to the driveway has been re-directed to a drum.
2. The drums and totes that were previously stored outside in the rear of your facility has been stored inside your facility.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders
Environmental Specialist
Division of Surface Water
