Re: Lucas County  
Waterline and Sanitary Sewer Improvements  
Construction Storm Water  
Facility ID No. 2GC03279\*AG

May 29, 2013

Mr. Kenneth Blair  
City of Waterville  
25 North Second Street  
Waterville, Ohio 43566

Dear Mr. Blair:

On May 22, 2013, Zachary Titkemeier, Tom Wilkins, and I inspected the Waterline and Sanitary Sewer Improvements along State Route 64 and US Route 24, Waterville. The purpose of our visit was to evaluate compliance of the site with the National Pollutant Discharge Elimination System (NPDES) permit for storm water discharges associated with construction activity (Construction General Permit CGP). The inspection was conducted under the provisions of Ohio's water pollution control statutes, Ohio Revised Code (ORC) Chapter 6111.

At the Waterline and Sanitary Sewer Improvements site, no earthwork was occurring and no construction equipment was present. Zachary Titkemeier corresponded with you through e-mail on May 23, 2013. You indicated that the project had been bid out to a contractor and the city council would be voting on the approval of the project at their June 3 meeting. The project involves putting in new waterlines and sanitary sewers along the intersection of State Route 64 and US Route 24. When construction does commence, please remember the permit requirements for storm water management during construction, such as weekly self-inspections and the requirement to apply cover within seven days on bare soil in any areas that will sit idle for more than 21 days. Your sediment controls must be installed within seven days of grubbing and before any grading.

Please note that the CGP has recently been reissued. You will be notified in the near future on how to reapply for permit coverage. Under this next generation of the permit, you will be required to temporarily stabilize any portion of the site that will remain inactive for more than 14 days (instead of 21 days).

If there are any questions, please contact me at 419-373-3009.

Sincerely,

Lynette Hablitzel, P.E.  
Division of Surface Water  
Storm Water Program
