Re: Top Cat Concrete City of Westerville / Franklin County 4GR00739*EG

Dear Mr. Taylor:

This letter is written regarding a joint storm water inspection we conducted at Top Cat Concrete, located in Westerville, Ohio on April 30, 2013. I understand this facility is covered under the Multi Sector General Storm Water Permit (MSGP). Based on my site observations and the conditions of the Storm Water Permit, the following items require attention:

- Please update your Storm Water Pollution Prevention Plan (SWPPP) in accordance with the conditions of the new MSGP.
- Please be aware there are new monitoring requirements pursuant to the new MSGP. All samples should be taken at the storm water outfall we observed entering Alum Creek.
- The direct discharge to Alum Creek associated with the vehicle rinsing/washing area must be eliminated. This is considered process water and not authorized for discharge under this Storm Water Permit. I strongly recommend modifications are addressed to ensure the wash water from the rinsing or washing of trucks, in addition to the water from the wheel wash station are managed in such a manner not to result in a direct discharge to Alum Creek. This water must be fully contained, recycled in a close loop system, or routed to sanitary via the permission of the local municipality.
- Ohio EPA recognizes the effort Top Cat has implemented to operate and maintain the concrete recycling system, in addition to the efforts to seal off all interior floor drains.
- I am concerned regarding the waste storage area at this site. The pit containment appears full and must be maintained.
