Re: Villas at Roxton Ravines, Fairfield County

Dear Mr. Phillips:

This letter is written regarding the storm water inspection that I conducted on June 4, 2013, at the Villas at Roxton Ravines located near the intersection of Ety Road and Fair Avenue, in Lancaster, Ohio. I understand that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on my site inspection and the General Storm Water Permit, the following items must be addressed.

Sediment and Erosion Controls:

There was active construction at the site. The site needs to maintain the existing erosion controls and install some additional erosion controls, such as silt fence or straw wattles. Please see attached pictures.

Please be aware that the General Permit states that all barren areas which will remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven days.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at (614) 728-3851.

Sincerely,

Gregory L. Sanders
Environmental Specialist
