**RE: Wyoming Middle School & High School; NPDES Permit # 1GC04479\*AG; Pre-Construction Site Meeting**

Dear Mr. Hilton:

I wanted to thank you along with Jay Bernard and Sam Hoh for requesting and taking the time to meet with me yesterday. As I reiterated during our meeting it is refreshing to meet individuals who take pride in being proactive in the sediment and erosion control portion of the construction process.

The plans showed to me by Mr. Bernard and Mr. Hoh for the demolition and sitework of the Wyoming Middle School seemed to implement measures for sediment and erosion control necessary for the site. In fact, as I expressed to Mr. Bernard and Mr. Hoh, some of the best management practice that are to be installed go above and beyond the requirements of the permit.

I would like to reiterate that the permit should not be terminated while work is still being done at the middle school. That includes the construction of the additions to the school once the demolition and sitework is complete.

Once again thank you for your time and if you have any questions regarding this project or any other project please do hesitate to contact myself or the Ohio EPA Southwest District Office.
