**RE: Rivers Local School District (New Pre-K to 12 School); NPDES Permit #  
1GC03857\*AG; Construction Site Inspection**

Dear Mr. Leesman:

On Monday, August 5, 2013, I inspected the Rivers Local School District (New Pre-K to 12 School) construction site located in Cleves, Ohio, to determine compliance with its NPDES construction site storm water discharge permit. I walked the property, but did not meet with anyone while at the site.

Based on my observations, there were no obvious violations of the project's storm water discharge permit. I did not review sediment control inspection logs, or the site's storm water pollution prevention plan (SWPPP).

I noticed that the project was near completion and that only a small amount of bare soil remained. Most areas of the site have been permanently stabilized with vegetation or other ground cover. Once final stabilization is achieved in all areas, the construction permit must be terminated by completing the one page "notice of termination" (NOT) form found at <http://www.epa.ohio.gov/Portals/35/permits/General NOT.pdf> and sending it to the following address:
