Mr. Carl C. Wintzer
Vice President
G.A. Wintzer & Son Company
P.O. Box 406
Wapakoneta, Ohio 45895

Dear Mr. Wintzer:

We are in receipt of your self-monitoring reports covering the months of April through June 2013 for the referenced facility. Our review indicates a violation of the conditions of your land application management plan (LaMP). The specific instance of non-compliance is enclosed on a separate sheet. We have received an email response from Mr. Marcus Wintzer on July 17, 2013, regarding the referenced violation and require no further information at this time.

Please be advised that failure to comply with the effluent limitations and/or monitoring requirements, including adequate laboratory controls, appropriate quality assurance procedures, and records retention, as specified in your Part III-General Conditions of your National Pollutant Discharge Elimination System (NPDES) permit may be cause for enforcement action pursuant to Ohio Revised Code (ORC) Chapter 6111. If these violations continue to occur and if satisfactory progress is not made, it may be necessary to initiate enforcement action to achieve compliance.

The Ohio EPA strongly encourages pollution prevention as the preferred approach for waste management. The first priority of pollution prevention is to eliminate the generation of wastes and pollutants at the source (source reduction). For those wastes or pollutants that are generated, the second priority is to recycle or reuse them in an environmentally sound manner. You can benefit economically, help preserve the environment, and improve your public image by implementing pollution prevention programs. Information about Ohio EPA's Office of Compliance Assistance & Pollution Prevention can be found on Ohio EPA's Website at <http://epa.ohio.gov/ocapp> or by calling (614) 644 – 3469.

If there are any questions, please contact me at (419) 373 – 3022.

Sincerely,
