Re: Seneca County
Davita Dialysis Clinic
Construction Storm Water
Facility ID No. 2GC02695

August 21, 2013

Mr. George W. Lathrop
WW Lathrop Company
28366 Kensington Lane, Suite 2
Perrysburg, Ohio 43551

Dear Mr. Lathrop:

On August 7, 2013, Tom Wilkins and Zach Titkemeier inspected the Davita Dialysis Clinic at 45 St. Lawrence Drive, Tiffin. The purpose of the inspection was to evaluate compliance of the site with the National Pollutant Discharge Elimination System (NPDES) permit for storm water discharges associated with construction activity. The inspection was conducted under the provisions of Ohio's water pollution control statutes, Ohio Revised Code (ORC) Chapter 6111.

It appears that construction activities at the Davita Dialysis Clinic are complete. The building was finished and the drive and parking lot were paved. A Notice of Termination (NOT) must be filed to relieve you of the obligation to comply with this general permit. An NOT may be filed when one or more of the following conditions have been met:

- Final stabilization has been established on all areas of the site for which the permittee is responsible. Final stabilization means that all soil disturbing activities at the site are complete and a uniform perennial vegetative cover of at least 70% density has been established over the entire site. All temporary erosion and sediment controls have been removed, properly disposed of, and all trapped sediment has been permanently stabilized; or
- Another operator(s) has assumed control over all areas of the site that have not been fully stabilized.

The site does not yet meet these criteria. While the disturbed land had a cover of grass, there were bare areas north and northwest of the building and west of St. Lawrence Drive. Also, it was not apparent what post construction storm water management controls had been installed. The permit requires that post-construction Best Management Practices (BMPs) are installed during construction to control pollutants in the storm water discharges that will occur after construction has concluded. Such practices may include, but are not limited to: storm water

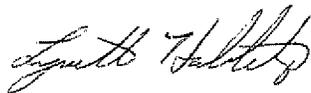

Mr. George W. Lathrop

extended detention structures; retention structures; water quality swales; and bioretention areas.

Please send a written response describing what post construction storm water management practices are being/will be implemented at the site within 10 days of the date on this letter. Your reply should include the type(s) of practices, the basis for its design, and installation dates. When all permit conditions have been met, please file the NOT form. The NOT form can be found on our website: <http://www.epa.state.oh.us/dsw/storm/stormform.aspx>. NOTs must be filed with Ohio EPA's central office within 45 days of when the above criteria are met.

If there are any questions, please contact me at (419) 373-3009.

Sincerely,

Lynette Hablitzel, P.E.
