RE: NOTICE OF VIOLATION OF OAC RULE 3745-21-09 (DDD) AT QUALITY SCRUB

Dear Ms. Moldovan:

Your Gas Dispensing Facility (GDF) is in violation of OAC rule 3745-21-09 (DDD)(2), which specifies Stage II testing requirements and its frequency. This facility was required to pass all necessary portions of Stage II testing on or before **May 17, 2011**. Your Stage II testing was not completed until **June 21, 2011**. This means that this GDF exceeded the permitted testing frequency by 35 days. Although you did attempt testing on April 28, 2011, which would have been within the required time limit, all portions of the testing were not passed until June 21, 2011. It is this factor which is the basis for this Notice of Violation.

This agency is in receipt of the June 21, 2011 test result submitted by Tank Integrity for the Quality Scrub Car Wash gasoline dispensing facility located at 61 Ghent Road, located in Akron and upon review, the test results are accepted as received and will be included in the operating file for this facility. However, acceptance of the information requested by this Agency does not constitute a waiver of this Agency's or the Ohio EPA's authority to seek civil penalties as provided in Section 3704.06 of the Ohio Revised Code. This Agency has the option to reject or accept late submittals. The determination to pursue or decline such penalties will be made at a later date.

This facility will be inspected on an annual basis for compliance with the Stage II vapor recovery rule. It is required that you keep record keeping information at a readily available location for inspection. For this Agency, it is requested that you keep copies of the required information at each individual location where all employees can access them.

Full compliance testing, as conducted at this facility, must be performed again within five year intervals according to the testing requirements of OAC rule 3745-21-09 (DDD)(2)(a)&(b). This facility will be due for **full testing** on or before **May 20, 2013**. Notification of testing is required as before, as well as reporting requirements.

Thank you for your cooperation and assistance in this matter. If you have any questions, please contact Harry Eckert at 330/375-2480 ext 3354

Sincerely,

Sam Rubens
Environmental Specialist Supervisor
