RE: TWO LLC Title V Inspection of 2011

Dear Mr. Zimmerman:

On April 28 and May 5, 2011, Toledo Environmental Services performed a Title V inspection at TWO LLC (premise number 0448020080) located at 1819 Woodville Rd., Oregon, Ohio, to verify compliance with the Title V terms and conditions of the permit.

A review of the 2009 and 2010 records was performed to verify compliance with the Title V permit. The records indicate compliance with the terms and conditions of the permit, however, there seems to be some confusion regarding the master equipment lists for those pieces of equipment subject to the various Leak Detection and Repair (LDAR) programs that the facility is subject to such as 40 CFR Part 63, subpart CC for wastewater, OAC rule 3745-21-09(T) and 40 CFR Part 60, subpart VV (if the latter is applicable).

Toledo Environmental Services recommends that the facility review the equipment lists subject to the LDAR programs and identify which pieces of equipment are to be on the master list for each LDAR program. Once complete, please mail the revised master equipment lists to my attention, within 2 months of receipt of this letter.

If you need any assistance regarding this letter, you may contact me at (419)-936-3955.

Sincerely,

A handwritten signature in cursive script that reads "Pam Barnhart".

Pam Barnhart
