Re: Request for status of Cedar Works revised compliance schedule as submitted on
November 6, 2009 in response to September 8, 2009 NOV

Dear Randy Phipps:

On November 6, 2009, our office received a revised compliance schedule for the Cedar Works, Peebles facility submitted in response to the September 8, 2009 NOV issued for a failed particulate matter emission compliance test conducted on July 1, 2009 on source B001 – Multi cyclone . Per the November 5, 2009, letter, Onix Corporation recommended installing an additional dual premium efficiency cyclone collector in series downstream of the existing dryer cyclone collector. The estimated timeframe for completing the installation of the new control equipment was indicated as roughly 10 -12 weeks for build time and 4 – 5 weeks for installation from the date Cedar Works places the order with the Onix Corporation.

We are now approaching 22 weeks since receipt of the revised compliance schedule. During a telephone conversation on April 1, 2010 with Matt Freeman of my staff, you stated that the new control equipment would be on-site the week of April 5, 2010.

This agency is requesting that within fourteen days of receipt of this letter, Cedar Works submit an updated compliance schedule which includes the new control equipment purchase order date with the Onix Corporation, the estimated installation completion date, and the proposed date a stack test for demonstration of compliance will be completed.

If you are unable to respond to any part of this request within the time frame discussed above, please inform us and explain so that we may be of assistance.

If you have any questions or need additional information, please contact me at 740-353-5156.

Cindy Charles
Director
Portsmouth Local Air Agency
