Dear Randy Phipps:

On September 30, 2008, Custom Stack Analysis LLC., performed a particulate matter emission compliance test at the facility indicated above on source B001 – Multi cyclone . The Portsmouth Local Air Agency received the test report on January 12, 2009. The test report has been reviewed and we have concluded that the test was conducted according to the procedures specified in 40 CFR Part 60, Appendix A, U.S. EPA Test Methods (1-5). The results of the test showed the source to be out of compliance with the applicable Ohio EPA regulations and your facility permit terms and conditions.

Our test review shows the following:

- |      |                          |   |
|------|--------------------------|---|
| I.   | Tested Emission Rate:    | 26.84 lbs/hr                                    |
| II.  | Allowable Emission Rate: | 8.9 lbs/hr                                      |
| III. | Source Operating Rate:   | 47,795 acfm                                     |
| IV.  | Isokinetic Rate:         | Run #1 – 94.15%; Run #2 -93.83%; Run #3 -94.53% |

Please submit to this office, within 30 days of receipt of this letter, a plan and schedule for achieving compliance. Submit this plan to the attention of Matt Freeman.
