COMPLIANCE TEST
CERTIFIED: 70063450000190562680**

Mr. Robert Allen
Merillat Industries, Inc.
960 East Main St.
P.O. Box 625
Jackson, Ohio 45640

Dear Mr. Allen:

On April 22, 2008, Almega Environmental Inc. performed a particulate emission compliance test at Merillat Industries, Inc., 960 East Main St., Jackson on the wood fired boiler (Emissions Unit B002). Ohio EPA received the test report on June 12, 2008. The test report has been reviewed and we have concluded that the test was conducted according to the procedures specified in 40 CFR Part 60, Appendix A, U.S. EPA Test Methods 1-5. The results of the test showed the source to be out of compliance with the applicable Ohio EPA regulations and your facility permit terms and conditions.

Our test review shows the following:

- A. Tested Emission Rate: 0.71 lbs/Million Btu
- B. Allowable Emission Rate: 0.32 lbs/Million Btu
- C. Source Operating Rate: 19.3 Million Btu/hr
- D. Isokinetic Rate: Run #1 - 91%; Run #2 - 95%; Run #3 - 93%

Please submit to this office, within 30 days of receipt of this letter, a plan and schedule for achieving compliance. Submit this plan to the attention of Steve Alspach.

Acceptance by Ohio EPA of a compliance plan and schedule does not constitute a waiver of Ohio EPA's authority to seek civil penalties as provided in Section 3704.06 of the Revised Code. The determination to pursue or to decline to pursue such penalties in this case will be made by Ohio EPA at a later date.
