RE: HADLOCK PLASTICS, INC.
DAPC FACILITY ID # 02 04 03 0272
AND 02 04 03 0456
AIR COMPLIANCE MONITORING
INSPECTION WARNING LETTER

CERTIFIED LETTER

Mr. Walt McSherry
Hadlock Plastics, Inc.
110 North Eagle St.
Geneva, OH 44041

Dear Mr. McSherry:

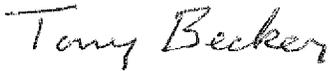

On February 16, 2012 and March 22, 2012, I met with you and Ms. Christina Lianopoulos to conduct an air compliance monitoring inspection at Hadlock Plastics, Inc. ("Hadlock") in Geneva, Ohio. Thank you for your time and courtesy spent during the inspection. The purpose of the inspection was to ensure that all emissions units were in compliance with applicable state and federal air pollution control regulations. The following information summarizes the outcome of the inspection:

- At the time of the inspection, all emissions units contained in your Title V permit as well as recently issued Permits-to-Install (PTIs) appeared to be in compliance with state and federal air pollution control regulations, except for P013 (1,500 pound press) and R011 (coating booth). As discussed, these emissions units have been installed and operating for more than one year. In the front section of each PTI, it states that the permittee has 12 months to submit a Title V application (operating permit application) after commencing operations of the emissions units covered by the PTIs. Please submit a Title V application through Air Services for both of these units within 30-days of receipt of this letter.
- Compliance was based on the walk-through inspection of the facility, conducting an inventory of all emissions units, observing actual operating parameters of many emissions units, reviewing plant records, and reviewing reports submitted to this office.

MR. WALT MCSHERRY
