Dear Mr. Gill:

Our records indicate that Stage II compliance testing occurred at RediGo Food Mart, 148 South Broadway, Geneva, Ohio on February 22 and April 9, 2010. This annual testing is required to demonstrate compliance with Ohio Administrative Code (OAC) Rule 3745-21-09(DDD).

The next annual Stage II compliance test is due in February 2011 and will include the five-year dynamic pressure test.

This office considers more than 30 days to complete a retest to be a violation of OAC Rule 3745-21-09(DDD). **Please be sure to have any retests performed within 30 days in the future.**

During this year's testing there were many parts that needed to be repaired or replaced. Please be sure to perform preventative maintenance to ensure this does not occur in the future. **Failure of next year's test will likely result in an enforcement action by our Central Office.**

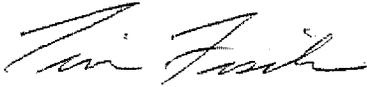

Maintenance records were not available during this year's testing. **Please be sure to maintain all records required by OAC Rule 3745-21-09(DDD) including throughput records and records of all maintenance activities.**

The proof of attendance and completion of the training required by the Ohio EPA for the operator or local manager of the gasoline dispensing facility was not available in violation of OAC Rule 3745-21-09(DDD). I have enclosed a copy of the Rule that is applicable to gasoline dispensing facilities as well as a list of testing companies. Some of these companies conduct the Stage II training. **We will expect that the training will be completed prior to your next Stage II test.**
