RE: Facility ID 13-18-00-0732.

Dear Mr. Kenney,

This letter is in response to the Notice of Violation dated September 22, 2008.

In our original letter to you dated October 6, 2008, we had a timeline for stack testing of our bag house by January, 19, 2008. We have received notice from our bag supplier, BWF America that the cages will not be ready to install until mid January. I have enclosed a copy of that letter. This means that the test will not be able to be done until mid-February because the bags have to "season" for 30 days. I am hoping that the test can be done sooner, if they can get the custom made bags finished earlier. I would like to request an extension of the deadline for testing to February 19, 2009.

We are continuing to diligently monitor any visible emissions and are making sure that the emissions are minimized or eliminated. I will have reports to you in early January showing compliance with this requirement.

Please call me at 216-749-0020 with any questions or concerns.

Sincerely,

Adrienne Klein
V. President

Cc: Jeremiah Hicks, Air Compliance Testing, Inc.
