RECEIPT OF CORRECTIVE ACTION FOLLOW-UP LETTER

Dear Mr. Gandhi:

On March 30, 2009, the Cleveland Division of Air Quality (CDAQ) issued a Receipt of Corrective Action Plan requiring McGean to submit a corrected deviation report for Emission Unit (EU) P039. CDAQ is in receipt of a corrected deviation report for EU P039 dated April 2, 2009.

The corrective action was received in a timely manner and appropriate steps were taken to bring the source into compliance. CDAQ has determined that no further enforcement action is warranted at this time, but reserves its right to take such action in the future if necessary.

CDAQ issues this letter with Ohio EPA's concurrence and does not excuse any violations of local, state and federal laws or regulations regarding air pollution control. Violations of air pollution control laws may be pursued in local court or referred to Ohio EPA or U.S. EPA for further enforcement action. Should you have any questions, please call Linda Kimmy at 216-664-2985. All correspondence with CDAQ must include the Ohio EPA facility identification number for McGean: 13-18-36-5229.

Sincerely,

Re: Corrected Deviation Report for PO39

Dear Ms. Kimmy:

As we discussed this morning, during my visit to your office on March 27, 2009, I inadvertently gave you the Correction Deviation Report for PO38 instead of PO39. In originally completing our response, I had made an error. When making the correction in the deviation report, I mistakenly entered the corrected info on PO38.

Attached please find the correct submission for Correction Deviation Report for PO39 (R-7 Reactor). Per our conversation, please discard the previous submission of PO38, which was mistakenly given to you on our visit of March 27, 2009.

I apologize for confusion and hope all is in order. Please let me know if you have any questions.

Sincerely,
McGean-Rohco, Inc.,

Dear Mr. Hearne:

Re: Revised Notification for OEPA permit 1318365229- P039 (13-04683)

This permit (P039) is for a specialty Chemical Making Vacuum/Pressurized Multiple purpose 1000 gallon Reactor R-7 and Condenser System Equipped with a Packed Tower Scrubber using Acidic or Alkaline Liquor.

Regarding the deviation reporting, following an audit, a closer inspection of our records indicated occasionally our pH is slightly outside the range specified in the permit. While it is not believed this would have a significant affect on emissions, it was corrected by review and adjustment of the control system parameters in the R-7 Process (P039).

We hope by means of this letter we have satisfied notification requirements up to date.

If you have any questions or suggestions, please let me know.

Very truly yours,
McGean-Rohco, Inc.
