**Re: Jefferson Industrial Corporation / Madison County  
Industrial Storm Water Permit 4GR00188\*DG**

Dear Mr. Pierce:

This letter is written in regard to an industrial storm water inspection that I conducted at Jefferson Industrial Corporation, on November 14, 2011, at your facility located in West Jefferson, Ohio. The inspection was conducted in order to determine compliance with your industrial storm water general permit. Your facility manufactures automobile parts. The following items were noted during the inspection:

I reviewed your storm water pollution prevention plan (SWP3) and spill prevention control and countermeasure (SPCC) plan. Both plans appeared adequate and were reviewed annually as per the general permit. Monthly inspections were also completed and well documented.

There are drainage swales around your property that discharge to a storm water pond. The storm water pond is located in the southeast corner of your property.

There were several dual compartment tanks located at your facility with secondary containment. Spill kits were located nearby and there was no staining of the pavement around the tanks.

There were two partially full totes stored outside without containment and not under roof. It was recommended that these totes be stored inside. You stated that they would be stored inside.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders  
Environmental Specialist
