PUBLIC NOTICE

**Ohio EPA Finalizes Decision Document for
Marathon Oil Bulk Plant #0279 Site
Fremont, Ohio**

On December 23, 2008, Ohio Environmental Protection Agency (EPA) finalized a Decision Document identifying the selected alternative to remediate contamination at the former Marathon Oil Bulk Plant #0279 Site located at 2416 West State Street in Fremont, Sandusky County, Ohio.

The 1.5 acre Marathon Oil Bulk Plant facility began operations in 1954 and ceased them in 1989. The storage facility consisted of above-ground storage tanks used to store leaded and unleaded gasoline, diesel fuel, and heating and lubricating oil. Based on the information identified during the remedial investigation and feasibility study, the preferred remedial alternative for the Site includes: monitored natural attenuation (i.e., ground water monitoring and evaluation program); well abandonment; a risk management plan for protection of construction and excavation workers; an environmental covenant establishing activity and use limitations for the Site property; and associated reporting.

On May 7, 2008, Ohio EPA issued a Preferred Plan that outlined Ohio EPA's preferred alternative to remediate contamination at the Site. A public meeting was held July 17, 2008, during which public comments on the Preferred Plan were accepted. In addition, written comments on the Preferred Plan were accepted through August 17, 2008. No comments were received by the Agency during the comment period.

A copy of the Decision Document has been provided to the Birchard Public Library, located at 423 Croghan Street, Fremont, Ohio. The Decision Document and related materials are available for review at Ohio EPA's Northwest District Office, 347 North Dunbridge Road, Bowling Green, Ohio (43402) by calling (419) 352-8461 to set up an appointment.
