**PUBLIC NOTICE
NOTICE OF RECEIPT OF 401 APPLICATION AND PUBLIC HEARING**

Public notice is hereby given that the Ohio Environmental Protection Agency (Ohio EPA) Division of Surface Water (DSW) has received an application for, and has begun to consider whether to issue or deny, a Clean Water Act Section 401 water quality certification for a project to construct Phases C and D of the North Central Outerbelt Project which involves reconfiguring the interchanges of I-270, State Route 315, and US 23. The application was submitted by Ohio Department of Transportation. The project is located on I-270 between State Route 315 and US 23 in Columbus and Worthington, Sharon Township, (40.112222, -83.026389). The Huntington District Corps of Engineers Public Notice Number for this project is LRH-2006-00124-OLR. The Ohio EPA ID Number for this project is 134190.

As required by the Antidegradation Rule, rule 3745-1-05 of the Ohio Administrative Code (OAC), three alternatives have been submitted for the project. The applicant's proposed preferred alternative, if approved, would impact 360 linear feet of jurisdictional ditch, 927 linear feet of intermittent stream, 1,673 linear feet of perennial, warmwater habitat stream, and 561 linear feet of perennial, exceptional warmwater habitat stream. Total stream impacts are 3,521 linear feet. The applicant's proposed minimal degradation alternative, if approved, would impact 360 linear feet of jurisdictional ditch, 927 linear feet of intermittent stream, 1,303 linear feet of perennial, warmwater habitat stream, and 561 linear feet of perennial, exceptional warmwater habitat stream. Total stream impacts are 3,151 linear feet. The applicant's proposed non-degradation alternative, if approved, would have no direct impacts on waters of the state.

Discharges from the activity, if approved, would result in degradation to, or lowering of, the water quality of the Olentangy River, Wilson Run, and three unnamed tributaries. Ohio EPA will review the application, and decide whether to grant or deny the application, in accordance with OAC Chapters 3745-1 and 3745-32. In accordance with OAC rule 3745-1-05, an antidegradation review of the application will be conducted before deciding whether to allow a lowering of water quality. All three proposed alternatives will be considered during the review process. No exclusions or waivers, as outlined by OAC rule 3745-1-05, apply or may be granted.

Starting October 4, copies of the application and technical support information may be inspected on Ohio EPA-DSW website: www.epa.ohio.gov/dsw

The public hearing will end when all interested parties have had an opportunity to provide testimony related to the project.

All interested persons are entitled to attend or be represented and give written or oral comments on the proposed project. The purpose of the hearing is to obtain additional information that will be considered by Ohio EPA prior to any further action on the application.

Ohio EPA will continue to accept written comments on the application through the close of business on December 10, 2013. Comments received after this date may not be considered as part of the official record of the hearing. PUBLIC NOTICE NOTICE OF RECEIPT OF 401 APPLICATION

Public notice is hereby given that the Ohio Environmental Protection Agency (Ohio EPA) Division of Surface Water (DSW) has received an application for, and has begun to consider whether to issue or deny, a Clean Water Act Section 401 water quality certification for a project to construct a 56-mile, 12-inch diameter, Natural Gas Liquids (NGL) pipeline, where 25 miles will be constructed in the Ohio Counties of Jefferson and Harrison. The application was submitted by MarkWest Liberty Midstream and Resources, LLC. The proposed pipeline extends in a southeast to northwest direction across Jefferson and Harrison Counties, after crossing the Ohio River from West Virginia. The pipeline will connect to the Hopedale Fractionator Plant near Jewett, Ohio. The Ohio EPA ID Number for this project is 134176.

As required by the Antidegradation Rule, rule 3745-1-05 of the Ohio Administrative Code (OAC), three alternatives have been submitted for the project. The applicant's proposed preferred alternative, if approved, would impact 2,353 linear feet of streams (ephemeral, intermittent, and perennial) and 1.6 acres of wetland. The applicant's proposed minimal degradation alternative, if approved, would impact 2,005 linear feet of streams (ephemeral, intermittent, and perennial) and 0.68 acres of wetland. The applicant's proposed non-degradation alternative, if approved, would have no direct impacts on waters of the state.

Discharges from the activity, if approved, would result in degradation to, or lowering of, the water quality of the Ohio River. Ohio EPA will review the application, and decide whether to grant or deny the application, in accordance with OAC Chapters 3745-1 and 3745-32. In accordance with OAC rule 3745-1-05, an antidegradation review of the application will be conducted before deciding whether to allow a lowering of water quality. All three proposed alternatives will be considered during the review process. No exclusions or waivers, as outlined by OAC rule 3745-1-05, apply or may be granted. Starting October 11, 2013 copies of the application and technical support information may be inspected at Ohio EPA-DSW, Lazarus Government Center, 50 West Town Street, Suite 700, Columbus, Ohio, by first calling (614) 644-2001.
