**Date of Public Notice: May 8, 2014**

**PUBLIC NOTICE  
NOTICE OF RECEIPT OF 401 APPLICATION**

Public notice is hereby given that the Ohio Environmental Protection Agency (Ohio EPA) Division of Surface Water (DSW) has received an application for, and has begun to consider whether to issue or deny, a Clean Water Act Section 401 water quality certification for a project to dredge the intake and discharge channels at the Avon Lake Generating Station Located at 33570 Lake Road in Avon Lake. The application was submitted by NRG Power Midwest LP. The Buffalo District Corps of Engineers Public Notice Number for this project is 2000-00838. The Ohio EPA ID Number for this project is 144377.

As required by the Anti-degradation Rule, 3745-1-05, of the Ohio Administrative Code (OAC), three alternatives have been submitted for the project. The applicant's proposed preferred alternative, if approved, would allow for dredging approximately 20,000 cubic yards of sediment from the intake channel and 43,000 cubic yards from the discharge channel, with all dredged material being open-lake placed at the previously approved U.S. Corps of Engineers open lake placement area. The applicant's proposed minimal degradation alternative, if approved, would allow for dredging approximately 20,000 cubic yards of sediment from the intake channel and 43,000 cubic yards from the discharge channel, with all dredged material being placed upland, dewatered and hauled to an upland disposal area. The applicant's proposed non-degradation alternative, if approved, would have no direct impacts on waters of the state.

Discharges from the activity, if approved, would result in degradation to, or lowering of, the water quality of Lake Erie. Ohio EPA will review the application, and decide whether to grant or deny the application, in accordance with OAC Chapters 3745-1 and 3745-32. In accordance with OAC rule 3745-1-05, an anti-degradation review of the application will be conducted before deciding whether to allow a lowering of water quality. All three proposed alternatives will be considered during the review process. No exclusions or waivers, as outlined by OAC rule 3745-1-05, apply or may be granted.

Starting May 8, 2014, copies of the application and technical support information may be inspected on Ohio EPA-DSW website:
